

Endurance® Modular ID System

Endurance® Modular is made-up from two elements; durable 1 metre length black plastic rails and separate black on yellow characters which slide into the rail to complete the ID

Endurance® modular is a very durable way to label pipes/valves or equipment. It is made up of separate black on yellow characters. These are slid into a black plastic supporting rail. The rail can also be supplied with a strong self-adhesive foam backing.

Rub and Read

There are two different heights of character and matching rail; 17mm and 30mm. The 17mm height system incorporates black characters that are raised on the yellow background. In this way even in dirty conditions they can be easily read. For the other sizes the black characters and yellow background are protected by a special see through surface.
